## PROJECTS

**OrangeHRM Web Application Testing — *Manual Testing, API Testing, Postman, SQL, Excel*** | *Website*

- Performed functional testing of Login, Employee (PIM), and Admin modules, covering positive, negative, and field-validation scenarios.
- Designed and executed 15 test cases, documenting test steps, test data, expected results, actual results, and execution status.
- Tested the employee API using Postman and validated HTTP status codes and JSON responses, including the unauthorized-access scenario.
- Executed basic SQL queries using SELECT and WHERE clauses to retrieve and validate employee records in a sample database.
- Prepared test execution reports and screenshots, recording 15 passed test cases and zero defects identified during execution.

**Script Labs — QA Testing Platform — *Manual Testing, Jira, SQL, Excel*** | *Website*

- Performed functional testing of Login, Script Management (CRUD), Product, and Cart/Checkout modules.
- Designed and executed 20 test cases covering core workflows, negative scenarios, required-field validation, and checkout functionality.
- Recorded 19 passed and one failed test case, achieving a 95% execution pass rate.
- Reported a medium-severity defect in Jira for missing validation when submitting a script with an empty required field.
- Performed SQL-based validation of sample product records and maintained test cases, execution reports, defect documentation, and screenshots in GitHub.
